Firmware file setUPS software Upgrade instructions

And click on the required link.

Firmware upgrade procedure

2. UPS connection

➔ Connect a cable to the UPS unit, on RS232 (DB9) port on the back of the UPS. Then connect the cable to your computer.

3. Launch setUPS

➔ For a first time Eaton® setUPS installation, double click on the exe file

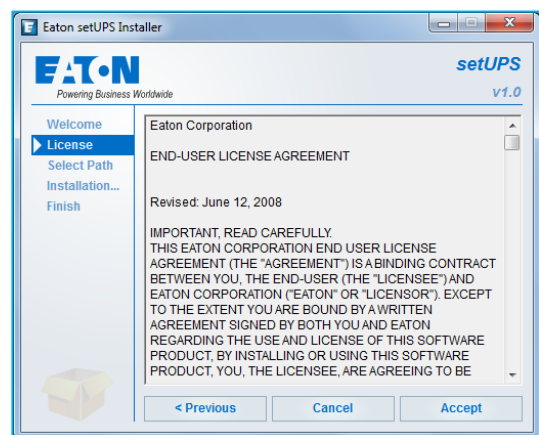

and valid the “User Account Control” message by “Yes”

The installer opens, click on “Next”

Read and click on “Accept”

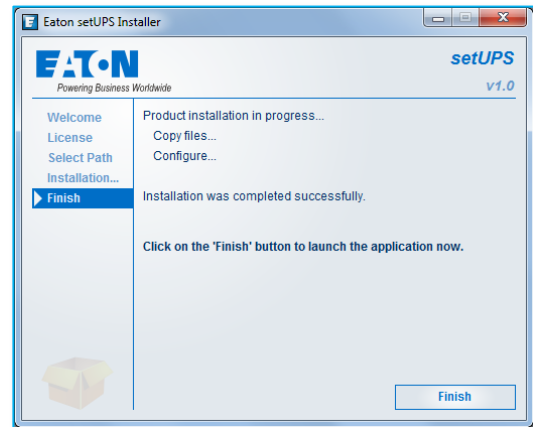

Firmware upgrade procedure

Click on “Install”

And on “Finish”

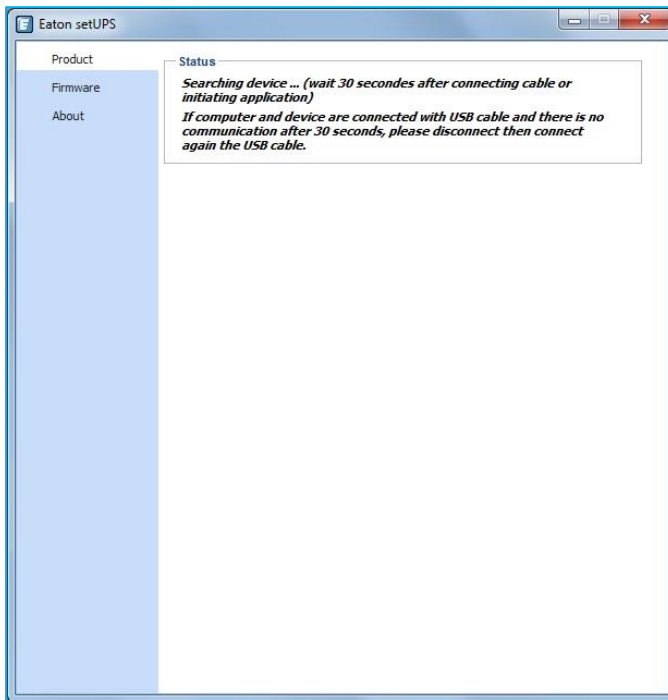

And the Eaton® setUPS starts.

→ If Eaton® setUPS is already installed, open setUPS

At the startup, the software searches for the connected UPS

Firmware upgrade procedure

and as soon as communication is done, the product is identified :

4. Go to Bypass

➔ On the UPS, press on the 2 buttons at the same time for more than 4 seconds. The upper led indicator (orange) illuminates, the message “ A C20” is displayed and a click noise comes from the UPS (relay) :

WARNING : loads are not protected anymore !

Firmware upgrade procedure

➔ Maintenance Bypass (MBP) of the UPS : at the UPS rear, switch up the MAINTENANCE breaker :
